

Living with psoriatic disease and planning for a family?

Ask your doctor about family planning today!

Why is it important?

- Some treatments may affect fertility and the health of your unborn child.
- Planning ahead helps protect both your and your baby's health.
- Talking with your doctor early ensures safe and personalized choices.

Scan the QR code to access the checklist we created for you. It will help you navigate all stages of having a family.

Your voice matters: together, you and your doctor can plan the best path forward.
